

Project HOTEL LA GAVINA  
SPAIN

## Eaves attached to an existing building Project Hotel La Gavina, Spain

Flat photovoltaic glass canopy photovoltaic modules integrated into a wood frame.

A new covered place by the pool, a living area ensuring visual and thermal comforts.

No connexion box, connector or wire is visible

The photovoltaic canopy can be either grid-connected or a stand alone solution for a real-time electriciry consumption.

*Cross vault is a type of vault used during the Middle Ages in cathedrals and abbatial churches.*
